ABOUT ME

I am a passionate and detail-oriented Front-End Developer with a strong foundation in building responsive, user-friendly, and visually appealing web applications. With expertise in modern technologies like React.js, Nextjs, JavaScript (ES6+), HTML, CSS, ReactBootstrap and Tailwind CSS, I specialize in transforming design concepts into seamless, interactive, and high-performance digital experiences.

WORK EXPERIENCE

EXPERIENCE:

Front-end Developer, Blockmob Company (March2024 –currently 2025)

1.5 year experience in...

PROJECT:

Gaya, IGO, Piqsol, Magnus, Evox, Raid AI, Iltezam and naitram
ProjectExplaination:

Naitram - Front-End Developer
- Developed the user profile and event management dashboard using modern front-end frameworks.
- Implemented features for users to create and edit personal profiles and manage their event listings.
- Built responsive UI components for the event creation form and ticket purchase workflow.
- Integrated with back-end services and payment gateway APIs to enable secure financial transactions.
- Implemented features like royalty mechanisms for secondary ticket sales, ensuring revenue sharing with event organizers.

Iltezam - Porjects:Volunteer/Donation Front-End Developer
- Designed and developed the front-end architecture for the project management module using React.
- Implemented features for creating new project posts, and searching/filtering existing ones based on various criteria.
- Built and integrated a responsive project feed component onto the application's main page to showcase initiatives.
- Focused on enhancing UI/UX to improve platform engagement and content discoverability.
